A Ever Strong Deck™ makes a beautiful addition to any home, offering an attractive, low-maintenance deck that would make any homeowner proud, but the beauty of a Ever Strong Deck™ isn't just what's on top. The beauty also extends below its surface ... thanks to Ever Strong Deck™'s revolutionary water-shedding technology.

Attractive Wood Grain Finish

(RW) Red Wood.

Like Having Two Decks in One

The heart of the Ever Strong Deck™ System is its interlocking design. This innovative system creates a water-shedding surface that prevents water from traveling below. Unlike Other decking systems, Ever Strong Deck™ channels water to the sides of the deck, not through it. This unique water-shedding design helps keep the space below the deck dry, even on rainy days. Whether the homeowner wants to use it for storage or an additional Entertainment area, the space below Ever Strong Deck™ is as useable as the space above it. It's like having two decks in one. The Ever Strong Deck™ is not intended for roofing applications.

As Strong As It Is Beautiful

In addition to helping keep the below-deck space dry, Ever Strong Deck™ is unique interlocking design also provides added strength. While traditional deck designs rely on the strength of each individual plank, Ever Strong Deck™ is interlocking design reinforces the Surface by locking all individual components into a single unit. The result is a deck that's so strong, it's *tough enough to take it.*

Going Green to an Extreme

B&H Wholesale Fence Is one of the largest producers of vinyl extrusions in the industry? We believe going green and great products can go hand in hand. While we engineer our profiles to maximize performance and value, we also keep in mind that We must do our part to help preserve the environment. That is why we capture our vinyl waste and recycle it into specific substrates, such as what is used in Ever Strong Deck™. We shield our Ever Strong Deck™ with our extreme finish, ACCU-Shield®. ACCUShield is an advanced acrylic PVC blend specially design to significantly reduce the damaging effects of the sun. This is particularly important in areas with ultraviolet exposure in hot, low humidity climates. ACCU-Shield could make it the perfect deck for any project in areas that experience these conditions, and if ACCU-Shield can stand up to those extremes, just imagine how it can protect your Ever Strong Deck™ in less challenging climates. Simply put, there is no better protection for vinyl decking under the sun than ACCU-Shield.

*Ever Strong™
"Built To Last"*

Safer and Virtually Free of Maintenance

Deck boards used in a Ever Strong Deck™ are made from a proprietary blend of UV stabilized vinyl making them virtually maintenance free. In fact, they're remarkably easy to clean, since the joints can't trap leaves, pine needles or other debris. They're also safer since they can't splinter like wood, and concealed fasteners mean there are no exposed screws or nails. Furthermore, because vinyl transfers heat better than most materials, Ever Strong Deck™ stays cooler to the touch even on the hottest summer days.

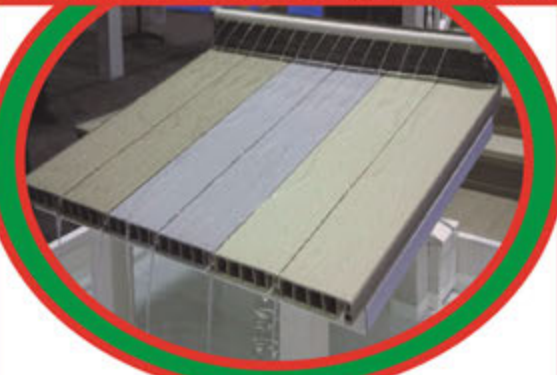

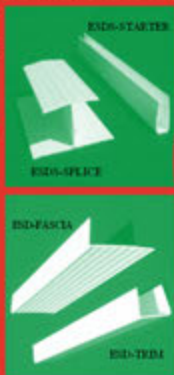

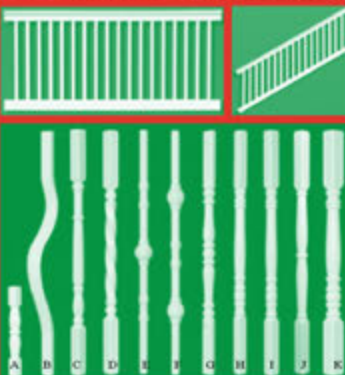

Add a New Deck or Resurface An Old One

Ever Strong Deck™ is low profile plank design (1-1/4") makes it ideal for retrofitting existing wood decks. Each plank measures six inches wide - similar to wood - and comes in lengths of 16, 20 and 24 feet. Its low profile and unique interlocking design make Ever Strong Deck™ one of the easiest and fastest decks on the market to install.

A Lifetime of Beauty Perfect for Any Style Home

B&H Wholesale fence, Ever Strong Deck™ will never rot, split, or decay, and is impervious to insects and moisture. Every Ever Strong Deck™ is covered by one of the toughest warranties in the industry - a one lifetime, transferable limited warranty* - making it the right choice for any homeowner.
